

Personalised Learning

We recognise students' diverse learning needs, whether they require a little extra support or new challenges in a specific area of learning.

Students' progress is monitored by all teachers who are able to promptly refer girls to our Personalised Learning Centre for extension or support, addressing any potential issues as soon as they arise. We practise seven weekly monitoring, ensuring quick action to keep our students engaged in subjects at levels appropriate to their understanding.

Our Personalised Learning Centre also offers English language support to students' learning in a second language.

Please download the Personalised Learning Centre brochure on the right for more detailed information about these programmes.
